

THE KIDNEY SCHEME

Success Rate	24%
Attracts	big-hearted chicks who are hopefully also big-breasted chicks
Requirements	hospital bracelet, bro
Prep Time	minimal
Bummers	have to know what the kidney does

THE PLAY

1. Put on a hospital bracelet. If you don't have one, root around inside a hospital dumpster. You're bound to pick one up ... among other things.
2. Once you've identified your target, flash your arm until she notices the bracelet. Say you don't want to talk about it and then immediately explain that you just gave one of your kidneys to your buddy. Wave to your bro and have him wave back.

NOTE

If you're flying solo, just wave at any dude and he'll probably wave back. If he gives you a look like he wants to kick your ass, just tell your target it's the anesthesia.

3. Tell her you've been best friends since grade school and if he didn't make it, well... let's just say it was a no-brainer to kidney-five him. If you can choke back a few tears here, that will lubricate matters. Speaking of which...
4. After you assure her that your remaining organs are in perfect working order, it's time to suggest making another donation...
